PROFILE

Automotive Engineering graduate with CATIA V5 experience in part design, sheet metal, assemblies and technical drawings. Designed equipment and tracked CNC production and efficiency using Excel during internships. Seeking mechanical design and product development roles.

EXPERIENCE

GREBO OTOMOTİV | Design Engineering Intern

Anadolu Industrial Zone, Ankara | Feb 2023 - Mar 2023

- Worked with a design engineer to check pre-series sheet-metal parts against technical drawings and manufacturing requirements, gaining exposure to bending, springback and manufacturability.
- Designed a parts trolley with drawers in CATIA V5 using existing factory solutions and standard materials; created part, sheet-metal and assembly models and technical drawings.
- Revised the design based on the department manager's feedback and obtained approval.

PİMSUN A.Ş. | Production Engineering Intern

Başkent Industrial Zone, Ankara | Sep 2022 - Jan 2023

- Built an Excel tool to calculate CNC machine efficiency and display results with conditional formatting. Incorporated into daily management reports, the tool remained in use after the internship.
- Tracked parts through CNC machining, subsequent operations and outsourced processing; helped return delayed or misrouted parts to the production flow.
- Helped operators resolve technical drawing and work-order issues by checking missing dimensions in AutoCAD files.
- Created new work orders in SAP using existing orders as references, closed completed orders and tracked production data.

SELECTED PROJECTS

- **Transmission Modeling:** Joined disassembly and measurement in a six-person team. Modeled the two-piece housing's internal and external geometry in CATIA and prepared its drawings; contributed to the overall assembly and report.
- **Shock Absorber Modeling:** Measured a physical shock absorber, modeled its parts and created the assembly in CATIA. Independently completed measurement, modeling, assembly and a report explaining its operating principle.
- **Personal CAD Design and 3D Printing:** Modeled custom parts from scratch to suit space constraints and different product dimensions, then produced them in PLA.

TECHNICAL SKILLS

CAD: CATIA V5 - Part Design, Assembly Design, Sheet Metal, Drafting; SolidWorks - Part Modeling

Technical Drawing: Dimensioning, section views, interpretation of dimensional tolerances and surface roughness symbols; basic GD&T knowledge

Manufacturing: Shop-floor familiarity with CNC machining, laser cutting, press-brake bending and welding

Tools: Excel - formulas, efficiency tracking and conditional formatting; SAP - work orders and production data tracking

EDUCATION

Afyon Kocatepe University - B.Sc. in Automotive Engineering | 2017 - 2023

Anadolu University - Associate Degree in Web Design and Coding | 2019 - 2021

CERTIFICATIONS & ADDITIONAL INFORMATION

Certification: Six Sigma Yellow Belt - VMEdU Inc. (2025)

English: TOEFL iBT 71 (Jun 2025)

Military service: Completed | **Driving licence:** Class B
